WELCOMING 2018

2018 bodes well for this makerspace! Since the start of the spring semester, the MILL has witnessed a sharp increase in students walking in to inquire about our services. The MILL has already printed several student projects, including a chess set, an impossible cube, an infinite chocolate bar, and more.

As the spring semester carries on, the MILL encourages students and staff to spread the word about MILL services and workshops. The MILL also has

two active social media platforms. Follow @uidahomill on Facebook and Instagram for daily information about projects, workshops, and more.

MAKE IT MONDAYS

Start your week off right, join us in the MILL every Monday for some creative maker time! This semester we are implementing a rotating Make it Monday system. The first Monday of the month will focus on the vinyl cutter and sticker design, the second will focus on button making, the third will focus on gaming, and the fourth will focus on robotics and programming. For a full Make It Monday schedule,

visit <https://www.lib.uidaho.edu/services/workshops/>
